Sophia

Sophia is a publication that provides a forum for philosophical thought for undergraduate students from the University of Victoria as well as other University or College students. Though the content is primarily intended for philosophy students, it is open to all disciplines premised on the hope of stimulating philosophical thought and dialogue in all academic communities.

We welcome constructive commentary and criticism concerning both quality and theme of any of the works published. For work that students may want to have published in next year's volume of *Sophia*, please see the back cover.
